Owners Manual

Caution

In order to avoid human injuries and property damages, before the use of this series equipment, please read the following important notices.

1. Before use of the equipment please read this Owner's Manual carefully. The equipment should be assembled and used strictly following the relevant instructions in this manual, and cannot change any of its components or disassemble it freely.
2. It should be ensured that all users have been fully aware of the safety warnings and precautions before they exercise on the equipment.
3. Too loose-fitting clothing cannot be worn, and sports shoes should be put on while exercising.
4. The equipment should be carefully examined before training. If there is damage, please do not use it and do not try to repair it by yourself. Please contact your supplier in time. It is necessary to inform after-sales service personnel as soon as possible to get the machine repaired.
5. The strength equipment is designed to support a maximum weight of 573LBS(260KG).
6. The equipment should be positioned on a flat, level and clean. There should be a reasonable space around the machine, to not cause injury to others when in use.
7. Children and pets should be kept away from the equipment whilst it is in use.
8. When using the equipment if you feel dizzy or physical pain you should stop exercising intermediately and consult a doctor.

Before using the equipment please consult your physician and fitness expert, and must be sure to read all the specifications in this owner's manual. Manufacturer will not be held responsible for any personal injury and property loss resulted from the incorrect use of the products.

Fitting Instructions

1.Be careful when you open the package and make sure no damage to the equipment surface.

2.Ensure there are enough people in help to move the machine to avoid any equipment damage.

3.Check all the parts and hardware are complete before assembly.

4.Make sure there are at least above 2 people to do the assembly process to guarantee the correct assembly location.

5.Please refer to the “Assembly Step” of the manual to make sure no “wrong assembly” or “missing assembly”

6.Use the correct tools for assembly to avoid unnecessary damage to equipment or staff.

7.Make sure all the assembly has been completed and hardware has been tightened before you move the equipment.

8.Only when you complete your assembly process, you could fasten all the bolts to make sure all the bolts are applied correctly.

9.After assembly, try to do a slight “ trial usage” to the equipment before your normal exercise to make sure the equipment is completely and correctly assemble.
