Height	320.5cm / 126-3/16″	Max. User	180kg / 397lbs

DESCRIPTION

The Pulse Fitness Rig 002 is a premium 3-bay, dual-sided functional training rig engineered for high-performance strength environments. Designed to accommodate a wide range of barbell, bodyweight and functional exercises, it features multiple chinning bar configurations, integrated storage and dynamic training stations such as ball targets and a bungee anchor. Its robust construction and modular design make it ideal for both individual and group training zones.

Constructed from heavy-gauge steel section, and built to endure the most vigorous of workouts. The free-standing, single or dual-sided Functional Training Rig is the most versatile, modular, piece of commercial fitness equipment available. Designed to support a wide range of workouts and accessory storage, all within one highly customisable, space-efficient solution.

The 960i can be configured (and re-configured if necessary) to fit into extremely specific spaces, and therefore can accommodate the needs of both athletes and gym-goers training needs.
