| Height | 320.5 cm / 126-3/16″ | Max. User | 180 kg / 397lbs |

## DESCRIPTION

The Pulse Fitness Rig 009 is a high-capacity 3-bay, single-sided functional training rig engineered for performance-driven environments. Designed to support a wide range of strength, conditioning, and accessory-based exercises, it features multiple chinning bar configurations, integrated storage and dynamic attachments including a landmine, dip station and punch bag arm. Its modular design makes it ideal for PT zones and group training areas where versatility is key.

Constructed from heavy-gauge steel section, and built to endure the most vigorous of workouts. The free-standing, single or dual-sided Functional Training Rig is the most versatile, modular, piece of commercial fitness equipment available. Designed to support a wide range of workouts and accessory storage, all within one highly customisable, space-efficient solution.

The 960i can be configured (and re-configured if necessary) to fit into extremely specific spaces, and therefore can accommodate the needs of both athletes and gym-goers training needs.
